

Relatório de instalação do mongoDB.

Como uso o windows optei pela versão community do mongoDB:

The screenshot shows the MongoDB website's download page for the Community Edition. The navigation bar includes links for Products, Solutions, Resources, Company, and Pricing. The left sidebar lists various products and tools, with 'MongoDB Community Server' highlighted. The main content area displays the version 6.0.6 (current) and the platform Windows. A green 'Download' button is visible, along with a 'Copy link' option. The browser's download bar at the bottom shows the file 'mongodb-window....msi' with a size of 200/482 MB and a download time of 52 seconds.

Executando o instalador:

baixando o mongosh:

The screenshot shows the MongoDB website's download page for the shell. The browser address bar displays `https://www.mongodb.com/try/download/shell`. The page features the MongoDB logo and navigation links: Products, Solutions, Resources, Company, and Pricing. A sidebar on the left lists various MongoDB offerings: MongoDB Atlas, MongoDB Enterprise Advanced, MongoDB Community Edition, and a 'Tools' section which includes MongoDB Shell (highlighted), MongoDB Compass (GUI), Atlas CLI, Atlas Kubernetes Operator, MongoDB CLI for Cloud Manager and Ops Manager, and MongoDB Cluster-to-Cluster. The main content area on the right shows 'separately from the Mong' and a 'Learn more' link. Below these are three specification boxes: 'Version 1.9.1', 'Platform Windows 64-bit (8', and 'Package msi'. A prominent green 'Download' button with a download icon is located at the bottom right of the main content area. At the bottom of the screenshot, a Windows taskbar is visible with two open files: 'mongosh-1.9.1-x64.msi' and 'mongodb-compas....exe'.

verificando se o mongosh está instalado corretamente:

```
PS C:\Users\Eduardo> mongosh --version
1.9.1
```

mongoDB compasse:
